

How to Cut & Clean your Sachets

1

Make a straight, horizontal cut across your empty sachet. Make sure not to cut the design or logo.

2

Rinse the inside of the sachet with warm water. Ensure that the inside corner and edges are clean.

3

Air dry the sachets for at least a few hours or carefully pat the inside of the sachets dry with a paper towel. Be careful not to crease the sachet.

4

Put your sachets in an envelope. Once you've dropped-off or mailed the clean sachets, **please register your donation through our corporate website: www.organogold.com/bags-for-life/**
